CLASS – X

AIMS AND OBJECTIVES

ENGLISH:

- To cultivate and incorporate proficiency in four essential language skills: listening, speaking, reading, and writing.
- To bolster students' capability to articulate their thoughts and emotions using their own words, while comprehending the usage of contemporary English.
- To offer students exposure to high-quality and relevant English Literature.
- To foster a keen interest in appreciating literature.
- To enable the effective and appropriate utilization of the English Language.

MATHEMATICS

- To help students develop a strong foundation in mathematical skills, concepts, and reasoning including numerical fluency, problem-solving abilities, logical thinking, and analytical skills.
- To develop mathematical curiosity and use inductive and deductive reasoning when solving problems.
- To encourage students to develop mathematical models to represent and solve real-world situations.
- To develop the knowledge, skills and attitudes necessary to pursue further studies in mathematics.
- To develop abstract, logical and critical thinking and help students see the relevance of mathematics in various domains, such as science, technology, engineering, and social sciences.

PHYSICS:

- To demonstrate the practical applications of physics principles in everyday life and various fields, including engineering, technology, medicine, and environmental science.
- To develop skills in practical aspects of handling apparatus, recording observations, drawing diagrams, graphs and in deducing inferences.
- To develop instrumental, communication and problem-solving skills.
- To ignite students' curiosity and interest in the natural world.

CHEMISTRY

- To impart foundational knowledge and understanding of the subject like concepts, principles, theories, and terminology related to the composition, structure, properties, and transformation of matter.
- To help students understand how chemistry influences various aspects of society, such as medicine, energy production, environmental conservation, and material science.
- To foster collaborative and communication skills in students so they are able to work effectively in groups, share and discuss ideas, present their findings, and engage in scientific discourse.

- To familiarize students with laboratory techniques, safety protocols, and experimental procedures, enabling them to conduct experiments, gather data, and draw conclusions based on their observations.

BIOLOGY

- To instill a passion for lifelong learning in students and encourage them to stay curious, keep up with advancements in biological sciences, and engage in ongoing learning beyond the classroom.
- To cultivate comprehension of the connections between living organisms and their adjustments to the environment.
- To provide students with foundational knowledge and skills necessary for pursuing further studies or careers in areas such as medicine, research, biotechnology, environmental science, or education.
- To help students gain the skill set of closely observing specimens, conducting experiments, formulating hypotheses, making inferences, accurately manipulating equipment, and producing precise recordings.

HISTORY AND CIVICS

- To enable the students to have an understanding of the working of the Indian Constitution and to actively participate in democratic processes, such as voting, public debate, and community involvement.
- To foster an understanding of human rights, social justice, and the importance of civic engagement and participation in a diverse society.
- To develop students' understanding and awareness of the past historical events, civilizations, cultures, and their impact on the present including exploring different perspectives, analyzing historical sources, and recognizing the significance of historical developments.
- To help students develop an appreciation for their own cultural heritage and an understanding of different cultures and identities and promote cultural diversity, inclusivity, and respect for cultural differences.

GEOGRAPHY

- To equip students with essential geographical skills such as map reading, interpretation of graphs and diagrams, data analysis etc. which will help them gather, analyze, and interpret geographical information.
- To cultivate students' awareness and understanding of the environment, including natural resources, ecosystems, climate patterns, and environmental issues and t
- To develop students' global perspective by examining and understanding the interconnectedness of different regions, economies, cultures, and environments.
- To inform students about the various career paths related to geography, such as urban planning, environmental management, geospatial technology, tourism, and international relations.

COMPUTER APPLICATIONS

- To develop students' digital literacy skills, ensuring they have a fundamental understanding of computer applications and their practical use in everyday life.
- To teach students how to navigate user interfaces, utilize software features and functions, and manage digital files and folders.
- To develop in students logical and analytical thinking ability so they can easily write interactive programs.
- To help students learn how to navigate technological advancements, acquire new software competencies, and stay updated with emerging trends and innovations in the field.

COMMERCIAL STUDIES

- To provide students with a comprehensive understanding of various aspects of commerce, such as business principles, economics, finance, marketing, entrepreneurship, and accounting.
- To enable students to acquire knowledge of market trends, consumer behaviour, competition, technological advancements, and global business practices and enable students to make informed decisions and adapt to the ever-changing commercial landscape.
- To enable students to prepare for personally fruitful and socially desirable careers in the field of business and commercial sectors.
- To develop students' financial literacy skills, including understanding personal finance, budgeting, investing, and managing resources.

ECONOMICS

- To help students understand fundamental economic concepts such as supply and demand, market structures, inflation, unemployment, economic growth, and international trade.
- To help students learn how to collect and analyze data, interpret economic indicators, and apply economic theories and models to real-world scenarios.
- To foster economic literacy among students, equipping them with the knowledge and skills necessary to understand economic news, policies, and debates and equip them with foundational knowledge and skills that can be applied in various careers, including economic research, policy analysis, entrepreneurship, banking, and consulting.
- To help them understand the interconnectedness of economies and to appreciate diverse economic systems and cultures, and develop an awareness of global economic challenges and opportunities.

PHYSICAL EDUCATION

- To instill values such as respect, teamwork, cooperation, and integrity, fostering positive attitudes and behaviors in sports and physical activities.
- To provide opportunities for teamwork, collaboration, leadership, communication, and decision-making, promoting positive social interactions and emotional well-being.
- To enhance students' physical fitness levels including improving cardiovascular endurance, muscular strength and endurance, flexibility, and body composition.
- To educate students about the importance of leading a healthy and active lifestyle by promoting knowledge and understanding of nutrition, injury prevention, stress management, and the benefits of regular physical activity.

HINDI

- हिन्दी पढ़ाने का मुख्य उद्देश्य बच्चों में हिन्दी भाषा और साहित्य के प्रति रुझान, रुचि पैदा करना और आपस में बातचीत करने की कला में महारथ हासिल करना क्योंकि हिन्दी हमारी राजभाषा है इसलिए बच्चों में इस भाषा के प्रति लगाव बढ़ाने की आवश्यकता है। इस भाषा के अर्न्तगत हिन्दी साहित्य में अपने देश की संस्कृति और सभ्यता का ज्ञान होता है।
- संत महात्माओं जैसे—कबीर, तुलसी और जायसी आदि कवियों की दिव्यवाणी से आध्यात्मिक ज्ञान एवं सम्पूर्ण विकास होता है।
- व्यक्तिगत व समूह में बहुबिषयक कार्य करने की योग्यता आती है।
- बच्चें अनुभव तथा सीखने पर आधारित ज्ञान, विश्लेषण, व्याख्या आदि माध्यमों से जटिल समस्याओं का निराकरण करना सीखेंगे।
- अपनी मातृभाषा से कुछ भी सीखना सरल, सहज, प्रभावशाली एवं रोचक बन जाता है।
